IT'S YOUR TURN DON'T MISS YOUR SHOT!

GET THE FACTS ON COVID-19 VACCINE

IT WORKS!

The COVID-19 vaccine is a shot that teaches our immune system how to recognize and fight the virus that causes COVID-19. It does not contain live virus.

Both the Moderna and Pfizer vaccines require two doses to be effective. The Johnson & Johnson vaccine only requires one dose.

If you suspect or know that you had COVID-19, it is still recommended that you get vaccinated.

Getting people vaccinated depends on the COVID-19 vaccine supply. In Pasadena, the quantity of vaccine is determined by the State of California. Everyone who wants a vaccine will ultimately be offered one.

IT'S SAFE!

The technology used to create the COVID-19 vaccine has been around a long time. The COVID-19 vaccine has been scientifically proven to be safe and effective.

Millions of people have already been vaccinated against COVID-19. The CDC and FDA continue to monitor vaccines to make sure even very rare side effects are identified.

There is a lot of information about the COVID-19 vaccine in the news, not all is based in science. Please look to trusted sources — doctors, nurses, and people who have received the vaccine — for accurate information.

Most side effects reported were mild to moderate in severity and resolved within 24 hours.
